

Netforce Marine Limited is a Nigerian Engineering, Construction, Procurement and Marine Operations Company in the Oil and Gas and marine industry. A 100% Nigerian owned company that provides system planning, Conceptual, FEED and detailed engineering design, procurement support, project management, professional manpower and construction services to the Nigerian Oil & Gas and Marine industry. Netforce Marine Limited has a multi discipline team of engineering employees operating out of two fully functional engineering facilities located in Lagos and Port Harcourt, Nigeria. We also have engineering personnel outsourced to the major oil & gas and marine companies.

Engineering / Design / Construction / Installation

Netforce Marine Limited follows all standard and best practices, regardless of the design application. In addition, Client revision can be made to suit project parameters and in-house policies. All components used are of the highest grade with the accurate as-built drawing provided with the equipment. We fabricated all types of import and export Metering Skids meeting all industrial standards.

Netforce Marine Limited can produce overall, I & E construction/fabrication/installation project technical support and co-ordination. We will work with our fabricator and subcontractor's as the first point of contact for I & E fabrication and hook-up portions of the project while providing crossover and interfacing with engineering.

Crude Oil Terminal Operation & Asset Management

NML offers a full range of services for the operation and management of onshore and offshore terminals. Providing support for the berthing and unearthing of Oil and LNG tankers is the core activity in this segment.

Crude Oil Lifting, Evacuation & Sales and Support

Netforce Marine Limited operates a fleet of tank trucks that haul crude oil and other petroleum products across Nigeria. We also have the capability to handle crude lifting, evacuation, sales, and support also following all regulatory requirements. We maintain stringent Health, Safety, and Environment (HSE) policies at all of our facilities while carrying out our operations. All employees and contractors must follow these policies and take any precautions necessary to protect both themselves and their colleagues. Safety is our top priority.

Supply Chain Management

NML delivers complete procurement solutions to oil field equipment including floating production and subsea production Systems. We have longstanding global alliance and rich network of Original Equipment Manufacturers (OEMs), and Authorized Distributors.

Manpower Support

NML creates the platform for the industry's host dedicated, qualified minded personnel both ashore and offshore. Together, our personnel and equipment continually sets the pace for safety and performance records in the offshore support solution world.

Marine Operation & Management

NML provides general marine operation as well as management. These operations includes Single Point mooring(SPM) marine support, Accommodation Vessels, Security Vessels, Heavy lifting vessels, Anchor Handling, Towage, Terminal Lifting operations, Valve and Well Head Services, amongst others.

Our Service Concept

Netforce Marine Limited (NML) provides to our Client's customized Turnkey Solutions, Engineering & Re-Engineering Development Services, Marine Operations, Troubleshooting Consulting Services and EPC Project Management. Netforce Marine Limited delivers world-class expertise, efficiency and value in project management, engineering and procurement management for the Oil & Gas industry.

We offer the complete spectrum of services for the Oil & Gas industry – from a simple part to procuring every piece of equipment that is to be deployed on your Facility. Netforce Marine Limited not only has the experience and skills to execute the projects, but also can provide the equipment to be used on your facility in a swift and timeline manner.
